

<b>Metabolic disease evaluation</b>
-------------------------------------

Amino acid chromatography(HPLC/TLC)
-------------------------------------

Ammonia
---------

Homocystinuria
----------------

Alkaptonuria ( Homogentisic Acid)
-----------------------------------

Lactate
---------

Maple suryp urine disease, screening test
---

Phenylalanine
---------------

Phenylketonuria ( PKU ) screening test
--

Reducing substances, ( urine, stool )
---------------------------------------

Classical galactosemia
------------------------

VBG (pH,pCO <sub>2</sub> ,pO <sub>2</sub> ,HCO <sub>3</sub> ,BE)
--

ABG (pH,pCO <sub>2</sub> ,pO <sub>2</sub> ,HCO <sub>3</sub> ,BE)
--
